Subject: Re: Petersen Ranch Spineflower Amendment
Attachments: Spineflower Intro Site Matrix.xlsx

Thank you very much for this input Lisa! We will review this in detail and get back to you with any questions. Regarding the credit breakdown of the introduction area that you requested, please see attached excel file that I distributed with my last email. I think this should have the information you are requesting, but if you would like something different please let me know.

Regards,

Nate

Hello Nate and Tracey,

Thank you for the explanation of the acreage differences between the official survey of the spineflower area and that obtained using GPS. We can just put this explanation in a footnote in the amendment document itself.

I am interested in hearing from the IRT about whether or not the access easement is a creditable area of the bank once the spineflower easement is in place.

I would still like a breakdown of how much of each credit type is being subtracted so it can more easily be determined if additional maps need modification or to verify the modified maps that were submitted. I know some of the credit maps, I think they are figures 63-66 show credits totals that have been reduced by 6.75 acres instead of 6.76.

Exhibit C-1 – Development Plan, Appendix A – Figures, have been updated with new figures 63-66. However, those show some easements, but not all of them and they do not identify the spineflower introduction area as an easement. All easements should be depicted the same according to the map legend. Figures 6, 8, 10, and 12 need to be updated with the easement delineated like the easement legend shows and the habitat acreages decreased. It would be good to know which easements area being credited and which are not based on the exhibit maps. I would think the ones shown on the maps currently are the ones that are not getting credits, but that is not clear from the figures and legends. Figures 17 and 56 have a monitoring point within? the easement area. The introductory area easement needs to be delineated on these maps as well. The bank sponsor will need

to confirm if the monitoring point is within the easement and if so, whether it's an appropriate location for a monitoring point.

Exhibit D-5 – LTMP- Figure 4 and Figure 4 (not sure why these are the same figure number with different items on them) need to be updated to show the Newhall easements.

Exhibit D-5 Appendix B – Grazing Plan, the amendment states that Figures 2, 5, 6, 9, 10 and 12 have been updated to remove introduction acreage from grazing areas/calculations. CDFW is not finding these figures in our files or RIBITS.

Exhibit E-2.1 – PAW – is not included in the amendment package in our file or RIBITS and will need to be updated.

Exhibit F-1.2 – Credit Crosswalk is also not included in our file or RIBITS and will need to be updated.

Exhibit F-1, The amendment requests says that exhibits F-1.3.1, F-1.3.3, F-1.3.5 and F-1.3.7 have been updated with the reduced acreages; however, CDFW is not finding these in our file or RIBITS either.

I don't know if it's just me who can't see this stuff in RIBITS or is it's really not there.

I've also attached the LTMP, grazing plan, and credit evaluation that contain some comments by CDFW.

Let me know if you have any questions or clues to the missing information.

Thank you,

Lisa
